

## GERIATRIC MEDICINE FELLOWSHIP PROGRAM

The mission of the Lafayette Geriatric Medicine Fellowship Program is to provide a holistic, person-centered approach to enhance quality of life while preserving dignity for the older patients that we serve. Our goal is to provide our fellows with outstanding clinical training so as to promote overall wellness to patients. Fellows see patients in the Family Medical Center, Ochsner University Hospital & Clinics, Ochsner Lafayette General Medical Center, nursing homes, private physicians' offices, home settings and other facilities.

## FELLOWSHIP HIGHLIGHTS

The Geriatric Medicine Fellowship Program in Lafayette is leading the area's medical community towards improved health care for the elderly of Louisiana. Through advanced education of physicians, we seek to improve the quality of geriatric inpatient and outpatient care by enhancing geriatric patient functional level, nutritional status, and psychological state. Our Program is a year-long concentrated and longitudinal experience available to Family Medicine and Internal Medicine residency program graduates. Clinical experiences include the inpatient geriatric consultation service, palliative care, geriatric psychiatry, rehabilitation, specialty clinics, elective/research, geriatric primary care and consultation clinics, and nursing home experiences.
