⁽¹⁾ Residents receive 28 days of vacation. Vacations will be allotted in a one week block every three months (quarter year). ESIR candidates begin IR-related rotations in RY-3 year.

IR Rotations-minimum of 8

IR-Related Rotations-minimum of 3

Possible Electives:

Chest Neuroradiology Musculoskeletal Cardiovascular

Nuclear Radiology Ultrasound Vascular Interventional

Breast Fluoroscopy ER Radiology Abdomen Pediatric Radiology MR-Float

Participating Site Information:

- 1. University Medical Center New Orleans
- 2. Children's Hospital (New Orleans)
- 3. Southeast Louisiana Veterans Health Care System

Description of procedures included in IR-related rotations:

- 1. Vascular and Interventional US-thyroid, lymph node and superficial cyst aspirations, solid organ biopsy procedures, diagnostic vascular US
- 2. Neuroradiology-cerebral angiograms (diagnostic and therapeutic), lumbar punctures, discography, spine injections, spine embolizations
- 3. Breast (Mammography)-breast biopsies including US and stereotactic image guided procedures
- 4. Fluoroscopy-HSG (including speculum and catheter insertion), enterography, catheter injections (abscessograms, nephrostograms, etc.), spine injections, bone biopsies, joint aspirations and CVAD troubleshooting/removal
